How it works!!!

If your Project is based on ecology-related work and you want to create a Project video page in EcoAgtube, please send your Project video page proposal (Project name, description) to support@ecoagtube.org for approval.

Once approved, a Project video page is created for you:

- You can then login and upload any videos or clips. You can also copy and paste a URL from another site such as YouTube and Vimeo.
- The uploaded video will be available in your Project video page on the EcoAgtube site.

How it works!!!

Project videos are NOT moderated by the EcoAgtube team. It is the sole responsibility of Project Manager and his/her team to make sure that:

- video does not contain any reference to agrochemicals (pesticides or fertilizers) or GMOs, as it will not be allowed on EcoAgtube.
- videos that are purely promoting a commercial product are not acceptable on EcoAgtube.
- videos that are offensive on the grounds of decency and discrimination against gender, race, religion, or politics will not be approved.

Please read EcoAgtube Disclaimer, Copyright, and Privacy Policy on www.ecoagtube.org before submitting your Project video page proposal.
